EDUCATION

University of Massachusetts Amherst

M.S. in Computer Science (Admitted; Program Start Sep 2026)

Amherst, MA

Expected May 2027

University of Massachusetts Amherst

B.S. in Computer Science | GPA: 3.9/4.0 | Dean's List

Amherst, MA

Expected May 2026

- **Relevant Coursework:** Machine Learning, Algorithms in Data Science, Programming Methodologies, Computer System Principles, Data Structures, Object-Oriented Programming, Calculus

TECHNICAL SKILLS

Languages: Swift, C#, Python, Java, Typescript, Javascript, HTML, CSS, XAML | **Frontend:** React Native, SwiftUI, .NET MAUI, HTML/CSS | **Backend:** ASP.NET, Node.js, Express | **Databases:** MongoDB, Supabase | **Tools:** Git, Docker

EXPERIENCE

Software Development Intern

May 2025 – Dec 2025

Industrial Video & Control

Newton, MA

- **Led the migration** of a web-based live video streaming product to a **cross-platform mobile app using .NET MAUI**.
- **Researched mobile UX patterns and redesigned 12+ views**, optimizing layouts for gesture-based experience.
- Built a collection of **10+ reusable custom controls** – including video player, tab view, and progress bar – reducing implementation time by **~25%** and ensuring consistent UI across platforms.
- Implemented **navigation, authentication, and 5+ services**, leveraging **dependency injection** to improve modularity and testability.

Undergraduate Course Assistant

Feb 2024 – Present

UMass Amherst

Amherst, MA

- Support **200+ students** with understanding essential topics, such as algorithms, data structures, asynchronous programming, abstractions, design patterns, and testing.
- Review **300+ code submissions** and lead weekly labs for **40+ students**.

Programmer Intern

Jun 2024 – Aug 2024

SiGlaz VN

Ho Chi Minh, Vietnam

- Migrated **~1000+ LOC Xamarin.Forms** app to **.NET MAUI** following **MVVM** standards for cleaner architecture, better readability and stronger view-model separation.
- Standardized **10+ UI screens and custom controls**, reducing layout bugs by **~20%** across iOS and Android.

PROJECTS

Graph-Based Note-Taking Platform | Javascript, React, Node.js, Django, Supabase

Feb 2026 – Present

- **Lead a 7-person development team** building graph-based note-taking platform using **React, Node.js, and Supabase**, delivering the product in a strict 10-week deadline.
- Serve as **primary liaison** between client and engineering team, coordinate meetings to ensure alignment on requirements.
- Define weekly project timeline with clear milestones, conducting weekly code reviews to ensure standards and reduce bugs.
- Decompose project goals into **20+ Github issues across 2 groups**, enabling them to work independently and reduce bottleneck.

Sports Match | Javascript, React Native, Node.js, Express.js, MongoDB

Sep 2025 – Dec 2025

- **Led team of 4** to develop sports matchmaking app using **React Native, Node.js, and MongoDB**, by defining project goals, setting schedule, managing team meetings, and tracking progress.
- Sped up development time by 3 weeks by **defining a UI design system** to use across the whole application.
- Implemented **5+ RESTful API endpoints** and **7+ screens** to support game creation, discovery, and user notifications.

UMass Events Map | Typescript, React Native, Supabase

Sep 2024 – Dec 2024

- **Collaborated in a 7-person Agile team** to develop a multi-platform, real-time event discovery app using **React Native**, enabling UMass students to find, locate, and create events around campus.
- Utilized **Figma** to design frontend, providing design specifications that **reduced development time by 2 weeks**.
- Implemented the search function and interactive map, improving event discoverability and campus navigation.
